To

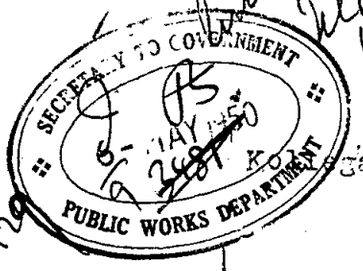
The Hon'ble the Minister for works and Electricity, Government of Madras
Madras.
(Camp Kollegal)



Petition of the ryots of Marthalli village, Kollegal Taluk submits as follows:-

2. There are over (150) wells in the village. The price of bullocks is gone high as well as the cost of their maintenance. The average ryot is not able in these days to meet it. Petitioners pray that you may be so good as to supply electricity for lifting water.

3. Power from Mettur is being supplied in villages which are about fifteen miles in a bee-line from Marthalli.

4. Petitioners therefore pray that you may be pleased to arrange to supply power pumps and electricity so as to advance agriculture.

5. Petitioners are settlers from the plains. A visit to the village will convince you how from what was a barren land infested with dacoits and wild animals making the Kollegal-Bhavani road a dangerous way for travellers smiling fields with corn, chillies & vegetables have been developed. Compared to other villages it is a smiling MY land flourishing on the toil and sweat of ryots. Petitioners dare say that there is not another village to matchit in industry.

6. Petitioners pray that you may be graciously pleased to visit the village and get at first knowledge.

7. Correspondence may be kindly addressed to Sri. Kovil Naggya Gownder, Landlord, Marthalli, Kollegal Taluk.

Sir,

Electricity - Coimbatore District - Kollegal Taluk - Extension of supply to rural parts.

Ref: Government Memorandum No.554-I/50-1 dated 8-2-1950.

With reference to Government Memorandum cited above I have to state that the Superintending Engineer, Pykara Electricity System has reported that sufficient loads are not forthcoming in the rural areas of Kollegal Taluk, to evolve extension proposals being formulated for supply of power to these areas on a remunerative basis.

2. Even in Kollegal Town where supply is available, agricultural loads are not forthcoming in sufficient numbers. Efforts are however being made to put up extension proposals for supply of power to agricultural loads in and around Kollegal Town by canvassing more loads. A further report will be sent in due course. Government Exchange reminder is returned herewith.

SECRETARY TO GOVERNMENT
6 JUN 1950
2782
PUBLIC WORKS DEPARTMENT

From,

A.V. Subbarayya Setty,

Agriculturist,

Kollegal.

6 JUN 1950

To,

The Honourable P.S. Kumaraswamy Raja, M.I.A., B.L.C.
Chief
The ~~xxxx~~ Minister,

The Government of Madras.

(Camp) Kollegal.

Respected Sir,

I along with seven others who own lands in the Papankari pasanam, Kollegal village have applied for electrical connection to our pumping sets for lift irrigation from our wells which were sunk before 1934. It is nearly a year since we have applied for the same. On 20-2-50 we have also given the certificate from the Revenue department to the effect that the wells were sunk before 1934.

Since there are no rains this year till now, we have to depend and raise our paddy crop only from our well water.

The Electrical department officers have ~~recommended~~ recomended this scheme as remunirative one and sent to the higher authorities for necessary action and to get the sanction of the Government. If we, eight applicants get electric connection, not only we irrigate our lands but also we can help our adjucent landholders by giving water to their lands also. Thus, this scheme is sanctioned and the connections were given it will benefit to about 200 acres of wet lands. We can also raise second crop and thus grow more food grains.

We are in the above circumstances I request your Honour to be kind enough to sanction the above scheme and get us the electrical connections at an early date. I request that the guarantee of 10% may be reduced to 5 per cent.

Kollegal
1-6-1950.

Yours sincerely,

A.V. Subbarayasetty.

SECRETARY TO GOVT. 2813 22 JUN 1950 PUBLIC WORKS DEPARTMENT

Government of Madras
(Public Works Department)

Memorandum No.2757 I/50-1 dated the 16 th June 1950.

Sub:- ELECTRICITY - Pykara System- Coimbatore District - Kollegal Taluk- Extension of supply of electricity for cultivation of mulbery to increase production of silk.

Read:- From the Taluk Congress Committee, Kollegal, petition dated nil to Hon'ble Chief Minister.

An extract of the petition cited above is forwarded to the Chief Operation Engineer (South) for necessary action and report.

T.V.NATESA MUDALIAR
Assistant Secretary to Government.

To the Chief Operation Engineer (South) with enclosures.
Copy to 'I' Section with enclosures.
Forwarded/By order

RK.2 19.6. Superintendent.

Extract of the petition dated nil from the Taluk Congress Committee, Kollegal to the Hon'ble Chief Minister, Madras.

** ** **

The foremost need of the industry now is to reduce the cost of production of the reeling cocoons which form the raw material for this industry. The entire mulberry cultivation of this taluk is dependant on the vagaries of nature to the same extent as the agricultural operations are. In the State of Mysore on the other hand, the mulberry plantations are rainfed as well as irrigated. Irrigation of mulberry gardens results in a greater output of cocoons and thus directly reduce the cost of production. Therefore, Sir, since the possibility of expansion of mx mulberry acreage is limited in this taluk, the only other alternative for us is to carry out a more intensive cultivation of mulberry to increase our output which is possible only with irrigation facilities. Therefore, sir, the private need of ours is irrigation facilities being afforded to us for our mulberry gardens. In the interior villages where electricity could be utilised, power supply lines from Sivasamudram may be taken to such villages as Sathegal, Uganiam, Danagerai, Saragur, Chikkinduvadi and other villages closeby. Similarly sir, when the Mekethadu hydro-electric scheme fructifies, some more villages such as Bandalli, Saggiam, Hanur may also be electrified and therefore we beg that this aspect of the industry may be kindly kept in view and a portion of the electricity which would be generated in the above scheme may be set apart for use for agricultural and sericultural operations in this taluk.

(True copy)

RK.19.6. Superintendent.

554/2 [Extract from PWD File no 2781 I/50] 19

CM 2897
20/6/50.

Extract from the Memorandum dated 1-6-50 presented to the Hon'ble Chif Minister by the Agriculturalists of Mullur village, Kollegal Taluk.

--

There are two minor irrigation tanks in the village for an area of about 800 acres of we and garden lands and one of the tanks remains disrepaired and hence incapable of supplying water even for one month. The only source of supply of water to these tanks is from Agaram Tank, in Mysore State which did not get full supply in recent years and consequence, our tank, did not get any supply and caused heavy loss of crops.

2. As such instances of loss of crops, were frequent the memorialists have sunk about 50 garden wells, partly from the state aid and out of their funds to improve the food condition, so that their village may be self sufficient. The cost of a pair of bulls and other agricultural implements have gone very high. It has not been possible to a common ryot, to buy two pairs of bulls, one for ploughing and the other for lifting up water from the wells, on account of the abnormal price of the bull and scarcity of fodder. In view of the above hardships, they have applied to the Electrcal Department and the Collector of Coimbatore to extend the power supply to their village for irrigation and also for lighting purposes. Their village is only two miles from the nearest Transformer at Kollegal.

3. It appears that the concerned officials are hesitating to execute the work for some reason or other. In this connection, the memorialists, beg to submit, that unlike the plains, the irrigation by means of electric power being new in these parts, the ryots are not able to realise the advantage of the system. If once, it is introduced as a demonstrative measure to the existing wells the other ryots also will follow the example and make the scheme successful. The Government are spending large amounts over such schemes elsewhere, to improve the food conditions in the country.

On account of the failure of timely rains the first seasonal crop (cholam etc) could not be cultivated The memorialists therefore beg to request that as a ttoken of the Hon'ble Chief Minister's visit, to the long uncared for and remote place of Kollegal taluk the officers moncern may please be directed to execute the work, ~~ex~~ as early as possible, so as to ensure the next pady crop to be cultivated not later than August next.

RYJ/13-11-50

For Chief Operation Engineer (South).

5543/50

Kollegal
Date 6th. Dec. '50.

From,

A.V.Subbrayadelu,
Agriculturist,
Kollegal.

The Secretary to the Government of Madras,
P.W.D., Madras.

Respected Sir,

Ref:- Supply of Electric Power to 8 wells at Papanakari pasanam, Kollegal.

I along seven others have applied for electric power to our pumpsets to bale water from our wells to our wet lands crops about 17th.August 1949. Ever since I am corresponding with The chief Electrical Inspector to the Government of Madras 2. The Superintending Engineer Pykara Electricity System Coimbatore. 3. The Divisional Electrical Engineer Pykara Electrical System Coimbatore. 4. The Assistant Engineer distribution (North) Pykara Electricity System Coimbatore. I have received reply only from The Superintending Engineer and not from any other persons mentioned above.
I have also addressed The collector of Coimbatorealso in the matter on 16th. Nov.'50., when he camped here. He promised to do his best in the matter especially at the time of food scarcity.

The Superintending Engineer Pykara Electricity System Coimbatore has informed me in his letter No. C.S.12825 dated 24-10-50 that the second point of HTline has been refused by the Chief Engineer Mysore Govt., and the proposal for supply is being re-examined by the field officer and I will be informed soon after the receipt of the proposal from the field.

The proposal even if it works will take more time to work out, since there is no other wells near by how can the re-proposal can work? To work out the present ~~pkara~~ scheme has taken ~~pkara~~ two years time. If new proposal means further two years time.

P.T.O.

There is no difficulty to the Chief Electrical Engineer To The Govt. of Mysore to give a second Tapping of HT line for this scheme. The present scheme has worked after our giving the special garintee of 40% for ten years as required by the Rules . If the Chief engineer to the Govt. of Mysore has accepted to give the scond tapping of HT line , the local junior engineer by this time would have taken the scheme for exucution. The Mysore Govt. Electrical HT line that feeds our local distribution line passes through our lands. there is no difficulty fot the Mysore Govt electrical department people to drop a second point of tapring by erecting one transformerat one of he poles desired by our electrical engineer. there is no other difficulty for them except reading the meter for every month. If we get the electrical connection to our 8 wells we not only can water our wet lands which totals about 65 acres in extent but also we can aid the neibhouring lands by giving them water from our wells. We also can easily raise the second crop by the help of the electrical connection., and the crops are secured even the rains failed. I am confident if we are given the connections it is sure the scheme will definitely spread among the ryots class. and they will have their due respect to wards their Government.

This year there is no rains since a month this information you might have received from the Collector's report, if no rains fallthe crops are sure to fail.

Once more IrequestYour kind self to be good enough to get us the ecectricity connectionto our pumpsetsand thus help us in the matter. If our Madras Govt. addressthe Chief engineer in the matterand request him to do the needful in the matter at an early date, he will heed your requestand grant the second point of HT line to our 8 wells scheme. There is no any hinderance to them to give the the second point of HTlineexcept placing a transformer near one of their poles that carries their HTline through our lands. The only difficulty they have to experienceis to read their meter at the second point of HTline. except this small trouble I do not think there is any other.

5543/80 29

once more I request on mybehalf and the other poor ryots who applied f
for the electricity connection request your kindself to help us in the
matter and see that the scheme is taken for execution at an early
date and oblige.

I am,

Yoursfaithfully,
A. V. Subbarayasetty.

Sir,

Sub:- Electricity - Pykara System - Supply of power to Marthalle village.

Ref:- Government Memo No.554-I/50-4 dated 29-5-50.

--0--

I submit that the District Agricultural Officer, Coimbatore inspected Marthalle village in Kollegal Taluk, in connection with the supply of power for agricultural purpose to that village. It is found that there are about 150 wells in that village. The nearest sub-station from which the power could be extended to this village is Kolathur Sub Station in Salem District. The ryots of the village want the supply of power very urgently at the cost of Government. The power is required for deepening the wells by boring sets and they only require energy for installation of sets.

2. In his letter No.4411 F/50-3 dated 21-6-50 and 4-1-51, the Chief Operation Engineer (South) has reported that a copy of similar petition from the ryots of Marthalle village has already been forwarded to him in Government Endorsement No.2129/I/50-1 Public Works Department, dated 15-5-1950, and the same is under consideration.

Extract from the Welcome Address presented to the Honourable Minister Sri M.Bhakthavathsalam with the Government of Madras by the Kollegal Taluk Agricultural Association.

---

4 We have the benefit of the 24 hour supply of electric energy from Sivasamudram power station 10 miles away. If the electric supply is speeded up to the large number of irrigation wells all round, we do hope to produce more food to feed this Taluk, which is now a deficit area-at least be self sufficient with regard to food.

To

The Secretary to Government,
Public Works Department,
Fort St. George, Madras.

No. 1276-F/51-2, dated 13-3-1951.

Sir,

Sub: Electricity - Supply in Kollegal Taluk - Pykara System.

Ref: My letter No. 4411-F/50-12, dated 27-1-1951 and Government Endt. No. 554-I/50-9, dated 9th February, 1951.

===

The feasibility of extension of supply to 8 wells in Kollegal was examined and found to be unremunerative as the same required a very high special guarantee. A revised proposal for extension of supply to 16 wells is now contemplated by the Superintending Engineer, Pykara Electricity System and it is expected in this office shortly, if the proposal is found in order after scrutiny. A further report will be sent to Government on its receipt.

ASSISTANT SECRETARY TO GOVERNMENT
PUBLIC WORKS DEPARTMENT
9 MAY 1951
SECRETARY TO GOVERNMENT
9-5-51
PUBLIC WORKS DEPARTMENT
MINISTER FOR AGRICULTURE
GOVERNMENT OF MADRAS

M. (P.W.)

The Honourable Minister of
Agriculture,
Government of Madras,
Madras
Camp- Kollegal.

Most Honoured Sir,

The Humble agricultural memorialists of Mullur Village of Kollegal Taluk beg to submit the following for your kind and favourable consideration;-

There are two minor irrigation tanks in this village for an acreage of about 800 of wet and Garden lands. One of the tanks remain disrepaired and hence is incapable of supplying water even for a month. The only source of supply of water to these tanks is only from Agara tank in Mysore State. In recent years the tank had not got its full supply due to the failure of rains and as a result of which our tanks did not get any supply of water and had caused heavy loss of crops.

The loss of crops had been continuous for the last three years the memorialists had sunk about more than FIFTY Garden Wells, partly from State-aid and out of their own funds to improve the water supply and thus produce more Food Crops. The cost of Bulls and other agricultural implements had gone up very high and as such a common ryot is not able to keep a pair bulls for his agricultural operations besides for lifting water from the wells. Scarcity of Fodder for cattle had resulted in many selling their cattle and conserving their small savings, to the detriment of Improvement of Agriculture. In view of these hardships and difficulties they had applied conjointly to the Electrical Department for affording opportunities for installation of Electric Pumpsets to lift water from their wells. They had applied to the District Collector Coimbatore who had strongly recommended for electric supply for Agriculture. This village is only two miles from the nearest Transformer at Kollegal. Repeatedly we have been requesting the Electrical Engineers to please arrange to give us an early accomodation to install Electric Pumpset in ~~their~~ our wells. They had been delaying the same for some reason or other, perhaps because the scheme may not be remunerative.

In this connection we the memorialists beg to submit that unlike the plains the irrigation by means of electric power is new in this area and the people had to be educated to use easy and modern improved methods of Agricultural operations. The Government should not think of losing on account of this expansion of electric line to Mullur for Agricultural Pumpsets. In the initial stages it may seem so but gradually we are sure all who have wells in their lands will surelyinstall an Electric Pumpset after seeing the effect of the easy operation and the savings and other benefits accruing from such a thing. It is therefore requested that the scheme should be introduced as a DEMONSTRATION MEASURE to show to the ryots the special advantages of Electrical Water Pumping etc. We are sure that many more wells will spring up and the scheme will become remunerative in a very short time. It has to be emphasised here that the Government will as a special case order extension to this village Electricity and we gurantee that we shall give the normal guarantee and take advantage of the same.

We had been repeatedly moving the authorities and so far we had not been fortunate to get any favourable reply from the authorities.

We do humbly request that the Honourable Minister of Agriculture will please look into this request and give us all succour and arrange to give us electric power for Agricultural Wells even though it may not seem remunerative in the initial instance.

We beg to remain, Sir, as faithful servants of the State,

Doddo Mocca Villg.

WELCOME ADDRESS
to
THE HONOURABLE SRI A.B.SHETTY,
MINISTER FOR AGRICULTURE, GOVERNMENT OF MADRAS,
MADRAS.

Most Honoured Sir,

We, the President and members of the Kollegal Panchayat, have great pleasure to greet you and accord you a hearty welcome to our Town, on your first visit. We are proud that a Kannada Minister is with us, this evening and we take this opportunity to put forth our longfelt and important grievances for early redress.

Kollegal Taluk has vast extensive area of cultivable land. Out of 45,000 acres under dry cultivation, more than 18,000 acres are under Mulbery (commercial crop). Fertile lands, where food crops were being raised by many poor ryots in Mudigundam whthin the panchayat area have been acquired for the Government Mulbery Farm, depriving the poor ryots of their lands, despite their protests to the Government. It is therefore suggested that any acquisition to be made for the purpose hereafter may be made outside Mudigundam area.

There are a series of tanks fed by the Gundal River, which is the only source of water supply for wet lands. Due to the shallow depth of the tanks and failure of rains for the last three years, there had been a very poor harvest all these years. Necessary arrangements may be made for deepening the tanks.

Kollegal is a poor Taluk and the ryots are incapable of constructing wells for agriculture and so the Government are requested to extend the Well Subsidy Scheme for this Taluk, as a special case to benefit the ryots.

The Gundal Reservoir Scheme is already in the list of the schemes with the Government and we hope that early steps will be taken to proceed with the scheme. The Government have already taken up for investigation the HONNAHALLA SCHEME, which will benefit about 1,500 acres to wet cultivation which lies largely within the panchayat area. This scheme has already been investigated in detail and we understand that the feasibility of this MINOR IRRIGATION SCHEME has been communicated by the Engineers. We, therefore, humbly request you, Sir, to please look into this matter immediately and to direct this minor work to be executed as early as possible.

Electric power is available at Kollegal, but the ryots feel sorry that inspite of several attempts to avail the power for agricultural needs, neither the Electrical Department nor the Agricultural Department have been taking steps to make electricity available for such needs, on easy terms. The terms now suggested by the department are not beneficial or encouraging to the ryots.

The Agricultural Department at Kollegal may be directed to station permanently at least ONE TRACTOR, ONE BULL DOZER and a good number of oil engine PUMPSETS for HIRE besides other agricultural implements.

We do hope and request you, Sir, to be pleased to look into our grievances and at least sanction the very early execution of the minor scheme of HONNAHALLA so as to enable us to GROW MORE FOOD.

JAI HIND.

We remain,
Most Honoured Sir,
Yours faithfully,

Kollegal,
1-5-1951.

C.Lakshmiah Setty
President & Members of the
KOLLEGAL PANCHAYAT, KOLLEGAL.

No.1276-F/51-16, dated 5th March, 1952.

Sir,

Sub: Electricity - Extension of supply to Marthahalli village in Kollegal Taluk.- ~~Ganki~~ Coimbatore District.

Ref: My letter No.1276-F/51-6 dated 13-6-51.

Further to my letter cited above, I have to state that Marthahalli village was investigated early in February, 1952 and the Superintending Engineer, Mettur Electricity System has reported that the place in general is very dry and almost all the people are holding only a few acres of land. It is stated that there are only 100 wells in patta lands and even if all the patta land owners are to take supply, supply will not be economically feasible since this involves long length of H.T. lines. Further only 10 persons are willing to take supply for agricultural purposes and 20 persons for domestic purposes.

It is reported that the economic condition of the ryots in the area would not admit of any extension being undertaken to this village. The proposal may therefore be deferred.

The Superintending Engineer, Pykara Electricity System has reported that concurrence of the parties for the special guarantee of Rs.60/- per HP per year is still awaited and that the field officers have been specially reminded on the matter. The superintending Engineer has also promised a further report on the feasibility of supply to other villages.

A further reply will be sent to Government on receipt of the Superintending Engineer, Pykara Electricity System's report.

No.1276 F/51-20 dated 26th August 1952.

Sir,

SUB: ELECTRICITY - Extension of supply to Kollegal Area.
REF: My letter No.1276 F/51-19 dated 6th August 1952.

Further to my letter cited above the Superintending Engineer, Pykara Electricity System reports that one of the parties included in the original scheme for extension of supply to 14 agricultural pumpsets in Kollegal was not willing to pay the required special guarantee of Rs.60/- per H.P. per year that a remunerative proposal with the remaining 13 parties is being worked out and that this will be submitted for sanction on receipt of the ownership certificate called for from the District Collector.

2. The present position in regard to supply to other villages referred to in para 1 of the Government Memorandum No.554 I/50-13 dated 11th August 1951 is indicated below:-

(i) The feasibility of extension of supply to 8 wells Papankari Pasanam Kollegal village was indicated already in my letter No.1276 F/51-2 dated 13th March 1951. The revised proposal referred to therein is the same indicated in para 1 above.

(ii) The feasibility of extension of supply to Mullur Village is being examined by the Superintending Engineer, Pykara Electricity System and he has promised to send a report shortly.

(iii) The feasibility of extension of supply to Sathegal Damager, Uggianam, Saragur, Chikkunduvadi and other villages was examined by the Superintending Engineer, Pykara Electricity System and he has reported that a remunerative extension to these areas was found impossible as the loads in these areas are poor besides being scattered, necessitating long length of L.T. Lines.

3. As regards para 2 of the Government Memorandum No.554 I/50-13 dated 11th August 1951, I invite reference to my letter No.1276 F/51-16 dated 5th March 1952.

Letter No.1276-F/51-22 dated 29-10-52.

Sir,

Sub:- Electricity - Pykara Electricity System - Coimbatore District - Kollegal Taluk, Kollegal area - Extension of supply for agricultural purposes.

p.85 cont Ref:- Govt. Memo No.554-E/50-19 dt.1-10-52.

---

p.85 cont With regard to the special circumstances under which the enhanced guarantee of Rs.60/- has been demanded from the parties included in a proposal for extension of supply of power for agricultural purposes in Kollegal area, it was found that even with the maximum limit of special guarantee usually adopted viz. Rs.50/- H.P. the scheme was not remunerative, and that the remuneretiveness of the scheme could be ensured only if a special guarantee of Rs.60 per H.P./per annum was taken from the parties. In view of the numerous representations from the area, it was decided that the proposal may be finalised on the basis of special guarantee of Rs.60/ H.P. per annum. Otherwise the extension would have been unremunerative and the proposal would have to be dropped.

2. The proposal for extension of supply to 13 Nos. pumpsets in Pallanakkarai, Pappanam in Kollegal area has been received in the Technical Branch. The estimated cost of the extension is Rs.48,000/- and it will be sanctioned by me in due course as it is within my powers of sanction.

Rem. 1 p.83 cont

3. No such higher guarantee of Rs.60 per H.P. per annum has been obtained in respect of any other extension in the area, but it was obtained in the present case as otherwise the proposal was unremunerative and would have to be dropped. The parties have agreed to give this special guarantee.

3. Another way of securing against failure of rice crop in Kollegal through to a limited extent would appear to lie in the provision of electric power for lifting water. To the next of Kollegal town is the Hommdai river almost perennial in this part of its course -it is in fact its terminal - to the North and north east in the Saragur Gundal carrying the flood and excess water of the Gundal river (as distinguished from the channel of its name) and the seepage of the rice fields on either bank of it. For a good length of it there is a flow all round the year. A long and wide belt of paddy ~~of~~ fields along these two streams can be watered by pumping from these streams. It is over a decade since this State purchased electricity in bulk from Mysore for the use of Kollegal. But so far only the Govt. silk filature and the Kollegal town are being served. The Panchayat Board is using it for lighting. The ryot needs food more than he ever wants electric lighting. But on some pretext or other electricity for agriculture is being refused. Mechanisation in this thinly populated taluk would be a great help in advancing agriculture. But so far as this taluk is concerned Govt. is yet to translate the profession and the theory to practice.

4. Arrangements ought to be speeded up at best in the matter of supplying electric power for lifting water so that a millet crop may be raised before the end of the fasli year to anticipate the impending food scarcity.

Sir,

Sub:- Electricity - Pykara Electricity System - Extension of supply of power to Mullur village - Kollegal Taluk.

Ref:- My letter No.1276F/51-27 dated 8-1-54.

The proposal for extension of supply of power to Mullur village in Kollegal is still under finalisation with the Superintending Engineer, Pykara Electricity System. The proposal which had been evolved by the field for Rs.1,92,700/- involved a special guarantee of Rs.60 per H.P. per annum to render the extension remunerative. After check, the Superintending Engineer, Pykara Electricity System has revised the proposal and the cost of the revised scheme works out to Rs.1,59,400 and it would be remunerative with a special guarantee of Rs.50 per H.P. per annum. The Superintending Engineer has instructed the field to obtain consent letters for special guarantees, applications from certain parties still due to be collected. The Superintending Engineer expects to send a proposal in final shape in July 1954. The scrutiny of the proposal in the Technical Branch will take some more time and a further communication will be sent to Government about the end of August 1954.

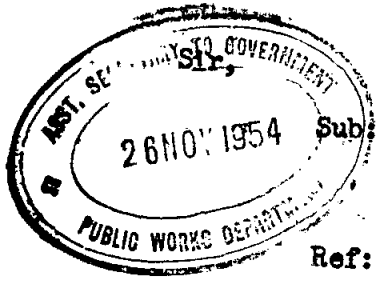
No. b-F/51-31, dated 22-11-1954.



Sir,

Sub: Electricity - Pykara System - Extension of supply of power to Mullur and Kunagahalli villages in Kollegal Taluk.

Ref: 1) My letter No.1276-F/51-18, dated 17-9-1954.
2) -do- 5219-F/52-5, dated 14-7-1953.

The feasibility of extending supply to Mullur and Kungahalli villages in Kollegal Taluk, has been carefully examined by the Superintending Engineer, Pykara Electricity System and it is found that no remunerative proposals could be evolved at present as either the parties are unwilling to give the special guarantee of Rs.50/- per H.P./year or are not keen in taking supply. Some who had expressed their willingness orally previously, have now fallen back when approached by the departmental staff.

Under the above circumstances there is no other alternative but to defer the extension proposals in these villages for the present till more loads come up in the areas.

21/5/94

21/5/94

WELCOME ADDRESS
to
THE HONOURABLE SRI A.B.SHETTY,
MINISTER FOR AGRICULTURE, GOVERNMENT OF MADRAS,
MADRAS.

Most Honoured Sir,

We, the President and members of the Kollegal Panchayat, have great pleasure to greet you and accord you a hearty welcome to our Town on your first visit. We are proud that a Kannada Minister is with us, this evening and we take this opportunity to put forth our longfelt and important grievances for early redress.

1 Kollegal Talukhas vast extensive area of cultivable land. Out of 45,000 acres under dry cultivation, more than 18,000 acres are under Mulbery (commercial crop). Fertile lands, where food crops were being raised by many poor ryots in Mudigundam within the panchayat area have been acquired for the Government Mulbery Farm, depriving the poor ryots of their lands, despite their protests to the Government. It is therefore suggested that any acquisition to be made for the purpose hereafter may be made outside Mudigundam area.

2 There are a series of tanks fed by the Gundal River, which is the only source of water supply for wet lands. Due to the shallow depth of the tanks and failure of rains for the last three years, there had been a very poor harvest all these years. Necessary arrangements may be made for deepening the tanks.

3 Kollegal is a poor Taluk and the ryots are incapable of constructing wells for agriculture and so the Government are requested to extend the Well Subsidy Scheme for this Taluk, as a special case to benefit the ryots.

4 The Gundal Reservoir Scheme is already in the list of the schemes with the Government and we hope that early steps will be taken to proceed with the scheme. The Government have already taken up for investigation the HONNAHALLA SCHEME, which will benefit about 1,500 acres to wet cultivation which lies largely within the panchayat area. This scheme has already been investigated in detail and we understand that the feasibility of this MINOR IRRIGATION SCHEME has been communicated by the Engineers. We, therefore, humbly request you, Sir, to please look into this matter immediately and to direct this minor work to be executed as early as possible.

5 Electric power is available at Kollegal, but the ryots feel sorry that inspite of several attempts to avail the power for agricultural needs, neither the Electrical Department nor the Agricultural Department have been taking steps to make electricity available for such needs, on easy terms. The terms now suggested by the department are not beneficial or encouraging to the ryots.

6 The Agricultural Department at Kollegal may be directed to station permanently at least ONE TRACTOR, ONE BULL DOZER and a good number of oil engines PUMPSETS for HIRE besides other agricultural implements.

7 We do hope and request you, Sir, to be pleased to look into our grievances and at least sanction the very early execution of the minor scheme of HONNAHALLA so as to enable us to GROW MORE FOOD.

JAI HIND.

We remain,
Most Honoured Sir,
Yours faithfully,

President & Members of the
KOLLEGAL PANCHAYAT, KOLLEGAL.

Kollegal,
1-5-1951.

(From the CE(E) no. 1276 F/57-8 dt 30.7.57)
The file relates to the representations from the villagers of Kollegal, Harur, Ramapuram, Marthahalli and Mullur villages in Kollegal Tk,

4

Cumbrative Dt., for extension of supply of elecy for agricultural purposes.

2/ The CoE (S) to whom all these representations were referred to, has stated that the feasibility of extension of supply of elecy to wells in and around Kolleyal area was examined by the S.E., Pykara System, and that a remunerative proposal could not be evolved with the existing low tension lines. He has also stated that the feasibility of evolving a proposal on a remunerative basis with 400 V, 25 cycles is being examined by the S.Es of Pykara and Kelta System and that proposals would be evolved if found in order. The petitioners may be informed of the position set out above. pp 51-52 C

3 A draft memo is submitted. After issue the papers may be closed after noting a call for 1-12-57 for reminding the CoE (S), if necessary. W.r.t. 2 'A' above. Circulation of the file to H.M.(Pr.) w.r.t. his remarks on pB of does not seem necessary A

5.8.57 7.8.57

The above note does not cover all the proposals made in the petitions in the C.F. It is not quite clear whether the proposals mentioned in the C.E's communication at pp 39 and 43 of C.F have been dropped in view of his report on pp 51-52 C.F. Please ascertain from the C.E whether his remarks at pp 51-52 C.F will apply to all the proposals in the petitions in the C.F. before submitting to him for remarks. X

A.S.

This file deals with request from the ryots of Marthalli, Harur, Ramapuram, Cowdally, Bidarelli, Kollegal, Sathegal, Uganiam, Dahagehai, Saragur & Chikkinduvadi, Mullur and other villages in Kollegal Taluk, Coimbatore District for supply of electricity for agricultural purposes.

Rural Areas of Kollegal Taluk.

The C.O.E. has stated that sufficient loads were not forthcoming in rural parts of Kollegal Taluk. In Kollegal village agricultural loads were not forthcoming. However he promised to evolve a proposal for loads in and around Kollegal Town.

Marthahalli Village, Kollegal Taluk:

C.O.E. has stated. The same that Marthahalli village was investigated early in February, 1952 and the Superintending Engineer, Mettur Electricity system has reported that the place in general is very dry and almost all the people are holding only a few acres of land. It is stated that there are only 100 wells in patta lands and even if all the patta land owners are to take supply, supply will not be economically feasible since this involves long length of H.T. lines. Further only 10 persons are willing to take supply for agricultural purposes

and 20 persons for domestic purposes.

It is reported that the economic condition of the ryots in the area would not admit of any extension being undertaken to this village. The proposal has been recommended to may therefore may be deferred..

Harur, Ramapuram, Cowdally, ~~Kottabetta~~ and Biderelli villages.

The C.O.E. has stated that the extension of supply to the villages East of Kollegal town involves 55 miles of H.T. and 30 miles of L.T. lines and that there is practically no load for the first 15 miles from Kollegal to Harur. Regarding the villages in Kollegal area, the feasibility of extension of supply was investigated twice in 1947 and 1948 and found unremunerative.

Papanakeri Pasanam, Kollegal village.

The C.O.E.(S) has stated that a scheme for supply to the agricultural pumpsets in Kollegal was evolved on a high guarante of Rs.60/- per h.p. per annum and that a ownership certificate called for from the District Collector is awaited, and that the proposal will be submitted for sanction.

Muthu village, Kollegal Taluk.

A report from the S.E., Pykara System, is awaited in C.O.E.(S)'s Office. This may be awaited.

Sathegal, Damagalai, Ugginam, Saragur, Chikkunduvadi and other villages.

The S.E. is reported to have stated that a remunerative proposal to these areas was found impossible as the loads in these areas are poor besides being scattered necessitating long length of L.T. Lines.

Attention is invited to the reports of C.O.E.(S) at pp.75, 81 and 83 c.f. in which he has stated that the consent of the parties for

para 1, p.83c

Memo p.1c/(P)

X

a special guarantee of Rs.60/- per H.P. per year is being ~~collected~~ obtained and that one out of the 14 parties is not agreeable to pay the required special guarantee. As the maximum special guarantee in all systems other than Madras Electricity System is generally ~~only~~ Rs.50/-, the C.O.E.(S) may be asked to quote the authority or the Spl. Circumstances for taking this high guarantee. Subject to approval, a draft memo is submitted.

p.5 ante

p.87c.

Please see the note from p.5 ante and the further report received from the C.O.E(S) at p.87c. with reference to 'X' above.

para 1 p.87c

para 3 p.87c

para 2 p.87c

para 1 p.83c.

He has stated that the remunerativeness of the scheme could be ensured only if the special guarantee of Rs. 60/- per H.P./year was taken from the parties and that such higher guarantee has not been obtained in any other extension schemes in the area. Further he has reported that the proposal for the above scheme has been received in the Technical Branch and that the extension scheme will be sanctioned by him in due course, as the estimated cost of it is only Rs. 48,000/- which is within his powers of sanction. Hence no further action is called for in this regard.

Further report of the C.O.E (S) may be awaited in respect of the extension schemes at 'A' on p. 5 ante and 'B' on p. 6 ante.

A.S

The notes from page 5 ante may be perused. In this file, the final report of the C.O.E (S) regarding extension to Mallur village, Kollegal Taluk is awaited. The C.O.E(S) has stated that the extension proposal is still under finalisation with the S.E, Pycara System, that the S.E has instructed the field to obtain consent letters from parties for a specific guarantee of Rs 50/- per h.p. per annum and that the SE expects to send the proposal in final shape in July 1954. The COE(S) has added that the scrutiny of the proposal in the Technical Branch will take some more time and a further communication will be sent to Govt about the end of August, 1954.

2 No further action is now called for. The papers may be recorded with a CBF against 1-9-54 to watch the receipt of extension proposals
